

Overview:
 We place a strong emphasis on the children learning and practising the fundamentals of mathematics, particularly number and calculation. We know the three stages of mathematical development – concrete, pictorial and abstract; and know these are progressive. For this reason, we see the use of concrete objects and manipulatives as fundamental building blocks that will ensure a thorough understanding of all mathematical concepts taught. We have also researched the importance of retrieval in mathematics, where practice of facts not currently being taught can be rehearsed and committed to long term memory; we begin every mathematics lesson with *Flashback 4* for this reason. We focus on deepening the children’s understanding through three areas: fluency, problem solving and reasoning. We want the children to think mathematically when problem solving and see that they can apply the mathematical knowledge and understanding that they have learnt previously, to a problem. This in turn will enhance students’ mathematical understanding and development., as they make links between the concepts taught.

- Fluency is primarily developed through varied and frequent practice.
- Reasoning is developed in two ways: routinely in lessons through a consistent teaching approach of asking ‘true or false?’, ‘why?’ more often than ‘how?’; and through specific topic activities designed to teach skills in the context of the topic.
- Problem solving is developed both through routine problems and non-routine problems; the latter are focused on specific problem-solving skills shown below and taught in the context of the topic. Problem solving tasks are introduced throughout each maths topic; and not just at the end. We endeavour to use problem solving tasks at different points of a maths lesson (sometimes at the start, not always at the end)

In each year, pupils will be learning to:

Statements in red highlight the areas in each year group that pupils should be fluent in

Number and Place Value

Algebra			<p>solve missing number problems such as $\square - 9 = 7$</p> <p>solve missing number problems by guessing and checking</p>	<p>use the inverse relationship between addition and subtraction to solve missing number problems</p> <p>use the inverse relationship between multiplication and division to solve missing number problems</p>	<p>solve missing number problems in addition and subtraction, with the range of numbers known so far</p> <p>solve missing number problems in multiplication and division, with the range of numbers known so far</p> <p>use the inverse relationship between multiplication and division to solve missing number problems</p>	<p>solve more complex missing number problems</p>	<p>recognise simple formulae given in words</p> <p>Start to recognise the same formulae in symbols</p> <p>describe simple linear number sequences in words (e.g. sequences like $2n, 2n+1$)</p> <p>identify what a later term, in simple linear number sequences, might be without identifying the term before, e.g. 2, 4, 6, -, ?,</p>	<p>use simple formulae such as for angles and areas, and speed</p> <p>generate and describe linear number sequences, find a one or two-step rule</p> <p>express missing number problems algebraically</p> <p>find pairs of numbers that satisfy an equation with two unknowns</p> <p>enumerate possibilities of combinations of two variables</p>
Terminology			split, separate, explain, problem missing number	predict, describe, record, order	rule	solution	formulae	linear number sequence, substitute, variables, symbol, known values

Measurement

Note: In this section, problem solving and reasoning are integrated into the different themes, separated by a dotted line. See progression at the end of the document when teaching problem solving and reasoning.

Themes within subject	Pre-School	Year R	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Length	make comparisons between objects relating to size and length	compare length, using comparative language, such as 'than'	<p>measure and begin to record lengths and heights (non-standard then standard units)</p> <p>compare and describe lengths and heights, e.g. long/short, longer/shorter, tall/short, double/half</p>	<p>choose and use appropriate standard units to estimate and measure length/height in any direction (m/cm)</p> <p>estimate and measure length/height (m/cm), to the nearest appropriate unit, using rulers</p> <p>compare and order lengths and record the results using $>$, $<$ and $=$</p>	<p>measure and compare lengths (m/cm/mm)</p> <p>add and subtract lengths (m/cm/mm)</p> <p>measure the perimeter of simple 2-D shapes</p> <p>find equivalent lengths in m and cm</p>	<p>start to convert between different units of measure, e.g. kilometre to metre;</p> <p>estimate and compare in mm, cm and m</p> <p>calculate in mm, cm and m</p> <p>measure and calculate the perimeter of a rectilinear figure (including squares) in centimetres and metres</p> <p>compare perimeters of different rectilinear figures</p>	<p>(Summer) $1\text{mm} = \frac{1}{10}\text{cm}$; $1\text{mm} = \frac{1}{1000}\text{m}$; $1\text{kg} \approx 2.2\text{ lbs}$; $1\text{litre} \approx 1.76\text{ pints}$; $1\text{m} \approx 39.4\text{ inches}$; $1\text{cm} \approx 2.54\text{ inches}$</p> <p>convert between km & m, cm & m, cm & mm</p> <p>understand and use approximate equivalences between inches and cm, and feet and metres</p> <p>measure the perimeter of composite rectilinear shapes in centimetres and metres</p> <p>calculate the perimeter of composite rectilinear shapes in centimetres and metres</p>	<p>(Spring) Be able to confidently convert $1\text{ km} \approx \frac{5}{8}\text{ mile}$, $1\text{ mile} \approx \frac{8}{5}\text{ km} = 1.6\text{ km}$</p> <p>(Spring) All conversions of units of measure</p> <p>use, read and write standard units of length using decimal notation to up to three decimal places</p> <p>convert between standard units of length using decimal notation to up to three decimal places</p> <p>convert between miles and km</p>
		use comparative language to group objects	<p>solve practical addition and subtraction problems for lengths and heights</p>	Solve problem solving tasks using all four operations			<p>use all four operations to solve problems involving length using decimal notation</p> <p>solve scaling problems involving length</p>	<p>solve problems involving the calculation and conversion of units of length using decimals</p>
Area and Volume	make comparisons between objects relating to capacity	compare capacity, using comparative language, such as 'than'	<p>measure and begin to record capacity and volume</p> <p>Compare and describe capacity and volume, e.g. full/empty, more than, less than, half, half full, quarter</p>	<p>choose and use appropriate standard units to estimate and measure capacity (litres/ml) using measuring vessels</p> <p>estimate and measure capacity (litres/ml), to the nearest appropriate unit, using measuring vessels</p>	<p>measure and compare volume/capacity (l/ml)</p> <p>add and subtract volume/capacity (l/ml)</p>	<p>find the area of rectilinear shapes by counting squares</p> <p>compare areas of different rectilinear figures</p>	<p>convert between l & ml</p> <p>understand and use approximate equivalences between pints and litres</p> <p>calculate the area of rectangles (including squares), in cm^2 and m^2</p> <p>compare the area of different shaped rectangles (including squares) and other compound shapes</p>	<p>use, read and write standard units of volume using decimal notation to up to three decimal places</p> <p>convert between standard units of volume using decimal notation to up to three decimal places</p> <p>recognise that shapes with the same areas can have different perimeters and vice versa</p>

MATHS PROGRESSION MAP

				compare and order volume/capacity and record the results using >, < and =			estimate the area of irregular shapes estimate volume, e.g. using 1 cm ³ blocks to build cuboids (including cubes) estimate capacity, e.g. using water	recognise when it is possible to use formulae for area of shapes calculate the area of triangles calculate the area of parallelograms recognise when it is possible to use formulae for volume of shapes estimate, calculate and compare volume of cubes and cuboids using cm ³ and m ³ calculate volume of cubes and cuboids using mm ³ and km ³
		use comparative language to group objects	<p>solve practical problems for lengths and heights (move towards abstract problems)</p> <p>solve practical problems for capacity and volume (move towards abstract problems)</p>				<p>use all four operations to solve problems involving volume using decimal notation</p> <p>solve scaling problems involving volume</p>	<p>solve problems involving the calculation and conversion of units of volume using decimals</p> <p>reason about connections between area of a triangle and area of rectangles and trapezium.</p>
Temperature			compare and describe temperature e.g. hot/warm/cold, hotter/colder (taught in humanities)	estimate and measure temperature (°C), using thermometers (taught in humanities)			measure temperature when negative	add and subtract temperatures that include negatives
Mass and Weight	make comparisons between objects relating to weight	compare weight, using comparative language, such as 'heavier than'	<p>Compare and describe mass and weight, e.g. heavy/light, lighter than</p> <p>measure and begin to record mass/weight</p>	<p>choose and use the appropriate standard unit to estimate mass (kg/g)</p> <p>measure mass (kg/g) to the nearest appropriate unit, using scales</p> <p>compare and order mass, and record the results using >, < and =</p>	<p>Use division facts to calculate: $1000 \div 2 = 500$; $1000 \div 4 = 250$ Use these when finding:</p> <p>$\frac{1}{2}$ L/kg/km = 500 ml/g/m</p> <p>$\frac{1}{4}$ L/kg/km = 250 ml/g/m</p> <p>$\frac{3}{4}$ L/kg/km = 750 ml/g/m</p> <p>compare mass (using kg/g)</p> <p>add and subtract mass (kg/g)</p>	<p>start to convert between different units of measure, e.g. kilogram to gram with simple numbers</p> <p>calculate in grams and kilograms</p>	<p>convert between different units of metric measure - gram and kilogram</p> <p>understand and use approximate equivalences between grams and pounds, kg and stone</p>	<p>use, read and write standard units of mass using up to three decimal places</p> <p>convert between standard units of mass, using up to three decimal places</p>
		use comparative language to group objects	solve practical problems for mass/weight	Solve problems for mass/weight using all four operations			<p>use all four operations to solve problems involving mass, using decimal notation</p> <p>solve scaling problems including mass</p>	solve problems involving the calculation and conversion of units of mass
Money	include counting money and change in role-play games	begin to use everyday language related to money in role play	<p>Number bond knowledge with coins, e.g. $10p+1p=11p$; $10p+2p=12p$</p> <p>recognise and know the value of different denominations of coins and notes</p>	<p>recognise and use symbols for pounds (£) and pence (p)</p> <p>combine amounts to make a particular value</p> <p>find different combinations of coins that equal the same amounts of money</p> <p>find the total</p>	<p>(Spring) Use knowledge of multiplication to calculate totals of money</p> <p>$50p \times 2 = £1.00$; $£50 \times 2 = £100$; $25p \times 4 = £1.00$; $£25 \times 4 = £100$; $20p \times 5 = £1.00$; $£20 \times 5 = £100$</p> <p>Convert pounds and pence to just pence</p> <p>find the difference</p>	<p>(Summer) Use knowledge of multiplication to calculate totals of money</p> <p>$£5.00 \times 2 = £10.00$; $£50 \times 2 = £100$; $£500 \times 2 = £1000$; $£2.50 \times 4 = £10.00$; $£25 \times 4 = £100$; $£250 \times 4 = £1000$; $£2.00 \times 5 = £10.00$; $£20 \times 5 = £100$; $£200 \times 5 = £1000$</p> <p>estimate, compare and calculate money in pounds and pence</p>		

MATHS PROGRESSION MAP

				<p>solve simple problems in a practical context involving addition of money of the same unit</p> <p>solve simple problems in a practical context involving subtraction of money of the same unit, including giving change</p>	<p>add and subtract amounts of money to give change, using both £ and p in practical contexts</p>	<p>use all four operations to solve problems involving money</p>	<p>use all four operations to solve problems involving money, using decimal notation</p> <p>solve scaling problems with money</p>	<p>use all four operations to solve more complex problems involving money and decimals</p> <p>solve scaling problems with money and decimals</p>
Time	<p>begin to describe a sequence of events, real or fictional, using words such as 'first', 'then...'</p>	<p>use everyday language related to time</p> <p>order and sequence two or three familiar events</p> <p>measure short periods of time in simple ways</p>	<p>compare and describe time, e.g. quicker, slower, earlier, later</p> <p>sequence events in chronological order using language e.g. before and after, next, first, today, yesterday, tomorrow, morning, afternoon and evening</p> <p>recognise and use language of dates - days of the week, weeks, months and years</p> <p>tell the time to the hour and half past the hour</p> <p>draw the hands on a clock face to show the time to the hour and half past the hour</p> <p>measure and begin to record time (hours, minutes, seconds)</p>	<p>Recite the months of the year in the correct order</p> <p>compare and sequence intervals of time</p> <p>tell and write the time to five minutes, including quarter past/to the hour</p> <p>draw the hands on a clock face to show the times to five minutes, including quarter past/to the hour</p> <p>know the number of minutes in an hour and the number of hours in a day</p>	<p>(Summer) The amount of days in each month / year / leap year</p> <p>Complements to 60, e.g. $25 + 35 = 60$</p> <p>tell and write the time from an analogue clock with normal numbers</p> <p>tell and write the time from an analogue clock with Roman numerals from I to XII</p> <p>tell and write the time from an analogue 24 hour clock</p> <p>use vocabulary such as o'clock, a.m./p.m., morning, afternoon, noon and midnight</p> <p>estimate and read time with increasing accuracy to the nearest minute</p> <p>record and compare time in terms of seconds, minutes and hours</p> <p>know the number of seconds in a minute</p> <p>know the number of days in each month, year and leap year</p> <p>compare durations of events e.g. to calculate the time taken by particular events or tasks</p>	<p>convert between minutes and seconds</p> <p>convert between hours and minutes</p> <p>convert between years and months, weeks and days</p> <p>estimate in seconds, minutes and hours</p> <p>compare and calculate in seconds, minutes and hours</p> <p>convert time between analogue and digital 12-hour and 24-hour clocks</p>	<p>understand the difference between writing hours and minutes e.g. 2:15, and writing hours as a decimal e.g. 2.25 hours</p> <p>read a timetable to find or calculate specific information (eg. how long will it take to travel from... to..., what time will...)</p>	<p>convert between standard units of time as needed, using up to three decimal places</p>
				<p>solve practical problems for time</p>		<p>solve simple problems involving converting units</p>	<p>solve problems involving 1 or 2 step conversion between units</p>	
Terminology	<p>day, week, month, year, weekend, birthday, holiday, morning, afternoon, evening, night, midnight, bedtime, dinnertime, playtime, today, yesterday, tomorrow</p>	<p>days of the week, before, after, next, last, now, soon, early, late, quick, quicker, quickest, quickly, fast, faster, fastest, slow, slower, slowest, slowly, old, older, oldest, new, newer, newest, once, twice, first, second, third, etc., money, coin, penny, pence, pound, measure</p>	<p>time, seasons, hour, o'clock, half past, clock, watch, hands, always, never, often, sometimes, usually, estimate, close to, about the same as, just over, just under, too many, too few, not enough, enough, length, width, height, depth, long, longer, longest, short, shorter, shortest, tall, taller, tallest, high, higher, highest, low, wide, narrow, deep, shallow, thick, thin, far, near, close, metre, ruler, metre stick, price, cost, buy, sell, spend, spent, pay, change, costs more, costs less, cheaper, costs the same as</p>	<p>quarter past/to, centimetres, metres, kilometres, grams, kilograms, millimetres, litres, temperature, degrees</p>	<p>leap year, twelve-hour/twenty-four-hour clock, Roman numerals I to XIII</p>	<p>convert, perimeter, area</p>	<p>volume, imperial units, metric units conversion</p>	

Shapes

Note: In this section, problem solving and reasoning are integrated into the different themes, separated by a dotted line. See progression at the end of the document when teaching problem solving and reasoning.

Themes within subject	Pre-School	Year R	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
2D Shapes	<p>talk about and explore circles, rectangles and triangles using language like 'sides', 'corners'; 'straight', 'flat', 'round'</p> <p>combine shapes to make new ones, e.g. a bigger triangle etc.</p>	<p>see how a shape can have other shapes within it e.g. two triangles can make a square</p>	<p>recognise and name rectangles (including squares), circles and triangles and sort according to common features</p>	<p>recognise and name quadrilaterals, pentagons, hexagons, octagons</p> <p>describe the number of sides of shapes met so far</p> <p>identify or draw any line symmetry in a vertical line for shapes met so far</p>	<p>Recognise, describe and draw 2-D shapes</p> <p>identify whether polygons are regular or irregular</p> <p>identify line symmetry as a property of regular polygons</p>	<p>recognise and name rhombus, parallelogram, trapezium (quadrilaterals)</p> <p>identify equilateral, isosceles and scalene triangles</p> <p>identify lines of symmetry in 2-D shapes in different orientations</p>	<p>understand that in a rectangle opposite sides are parallel and equal</p> <p>understand the difference between interior and exterior angles</p> <p>understand that in a rectangle interior angles are 90°</p> <p>understand that in a rectangle interior angles add up to 360°</p> <p>understand that in a rectangle diagonals are same length and bisect (halve) each other</p>	<p>understand that in a triangle angles add up to 180°</p> <p>understand that in an equilateral triangle each angle is 60°</p> <p>understand that in an isosceles triangle two angles are equal</p> <p>understand that in a quadrilateral, interior angles add up to 360°</p> <p>understand that in a regular polygon, exterior angles add up to 360°</p> <p>draw 2-D shapes using given dimensions and angles</p> <p>illustrate and name radius, diameter and circumference</p> <p>know that the diameter is twice the radius</p>
	<p>develop spatial reasoning skills by selecting, rotating and manipulating shapes</p>	<p>compare and sort common 2-D shapes and everyday objects</p>	<p>compare and classify different quadrilaterals based on their properties</p> <p>compare and classify different triangles, based on their properties</p> <p>complete a simple symmetric figure with respect to a specific line of symmetry</p>	<p>use the properties of rectangles to find missing lengths</p> <p>use reasoning about equal sides and angles to distinguish between regular and irregular polygons</p>	<p>compare and classify geometric shapes based on their properties and sizes</p> <p>find unknown angles in any triangles, quadrilaterals, and regular polygons</p>			
3D Shapes	<p>talk about and explore solid shapes such as cuboids and balls (<i>round is an acceptable description at this age</i>)</p> <p>select shapes appropriately e.g. flat surfaces for building, a triangular prism for a roof etc.</p> <p>Combine shapes to make new ones e.g. an arch, a bigger cuboid etc.</p>	<p>copy increasingly complex 2D pictures and patterns with these 3D resources</p> <p>see how a shape can have other shapes within it e.g. squares on the faces of a cube</p>	<p>recognise and name cubes, pyramids and spheres</p> <p>identify that circles are round, but really spheres are spherical</p> <p>begin to sort 3D shapes according to common features</p>	<p>recognise and name cuboids, cylinders, other prisms and cones</p> <p>describe the number of edges, vertices and faces</p> <p>identify 2-D shapes on the surface of 3-D shapes, e.g. a circle on a cylinder and a triangle on a pyramid</p>	<p>make 3-D shapes using modelling materials</p> <p>recognise and name regular pyramid (tetrahedron) seen in 3D</p> <p>recognise and name hexahedron and octahedron seen in 3D</p> <p>recognise 3-D shapes in different orientations and describe them</p> <p>identify whether polyhedra seen in 3D are regular or irregular</p>	<p>identify cubes and other cuboids, from 2-D representations</p> <p>identify pyramids, cylinders, cones and prisms from 2-D representations</p> <p>identify hexahedron and octahedron from 2-D representations</p>	<p>recognise, describe and build simple 3-D shapes, including making nets</p>	
	<p>begin to categorise objects according to properties, such as shape or size</p>	<p>select, rotate and manipulate shapes in order to develop spatial reasoning skills.</p>	<p>compare and sort common 3-D shapes and everyday objects</p> <p>make patterns with 3D shapes</p>	<p>compare and classify 3-D shapes based on their properties</p>				

MATHS PROGRESSION MAP

Angles and Lines					<p>recognise angles as a description of a turn</p> <p>recognise angles as a property of shape</p> <p>identify right angles</p> <p>recognise that two right angles make a half-turn, three a three-quarter turn and four a complete turn</p> <p>identify whether angles are greater than or less than a right angle</p> <p>identify horizontal and vertical lines</p> <p>identify pairs of perpendicular and parallel lines</p>	<p>identify acute and obtuse angles</p>	<p>know angles are measured in degrees</p> <p>draw given angles, and measure them in degrees ($^{\circ}$), using a protractor</p> <p>understand angles at a point make one whole turn (total 360°)</p> <p>understand angles at a point on a straight line make half a turn (total 180°)</p> <p>identify other multiples of 90°</p>	<p>understand vertically opposite angles are equal</p>
						<p>compare and order angles up to two right angles by size</p>	<p>estimate and compare acute, obtuse and reflex angles</p> <p>use the properties of rectangles to deduce related facts and find missing angles</p>	<p>find unknown angles in any triangle, in quadrilaterals, and in regular polygons</p> <p>find unknown angles using angles at a point, angles on a straight line and vertically opposite angles</p>
Position and Direction	<p>understand position through words alone, e.g. "The bag is under the table," – with no pointing</p> <p>describe a familiar route</p> <p>start to use words like 'in front of' and 'behind'</p>	<p>use positional language such as top, bottom, middle, between, inside</p> <p>describe their relative position such as 'behind' or 'next to' or 'in front'</p>	<p>describe position, using words like left, right, top, middle, bottom, on top of, in front of, above, between around, near, close, far, inside, outside</p> <p>describe their own movement using words like forwards, backwards, sideways, left, right, up, down</p> <p>describe their own turning movement, including whole, half, quarter and three-quarter turns</p>	<p>describe movement of another person or robot using mathematical words like straight line, rotation, left, right</p> <p>describe rotation of another person or robot as clockwise or anti-clockwise</p> <p>describe rotation of another person or robot as a number of right angles for quarter, half and three-quarter turns</p>		<p>describe positions on a 2-D grid using coordinates in the first quadrant</p> <p>describe movements between positions as translations of a unit to the left/right and up/down</p> <p>plot specified points and draw sides to complete a given polygon</p>	<p>identify and draw the position of a shape following a reflection in lines parallel to the axes</p> <p>describe the position of a shape reflected in lines parallel to the axes, using language like coordinates, mirror line, image</p> <p>understand that reflection does not change a shape (the shape is 'flipped')</p> <p>identify and draw the position of a shape following a translation</p> <p>describe the position of a translated shape, using language like coordinates, translated _ left and _ down</p> <p>understand that translation does not change a shape (the shape slides to a new position)</p>	<p>describe positions on the full coordinate grid (all four quadrants)</p> <p>draw and translate rectangles, parallelograms and rhombuses</p> <p>draw and reflect rectangles, parallelograms and rhombuses in the axes</p>
Terminology	<p>up, down, forwards, backwards, sideways</p>	<p>before, after, beside, next to, opposite, apart, between, middle, make, build, draw</p>	<p>edge, centre, direction, journey, left, right, across, close, far, near, along, through, to, from, towards, away from, movement, slide, roll, turn, whole turn, half turn, stretch, bend, corner (point, pointed), face, side, edge,</p>	<p>rotation, clockwise, anticlockwise, straight line, ninety degree turn, right angle, size, bigger, larger, smaller, symmetrical, line of symmetry, fold, match, mirror line, reflection</p>	<p>horizontal, perpendicular and parallel lines, greater/less than ninety degrees, orientation (same orientation, different orientation), clockwise, anti-clockwise, quarter turn, half turn, three quarter turn, full turn</p>	<p>quadrilaterals, triangles, right angle, acute and obtuse angles, degrees, co-ordinate, translate, quadrant, X-axis, Y-axis</p>	<p>regular and irregular polygons, reflex angle, dimensions, vertices, mirror line, reflect, image</p>	<p>vertically opposite (angles), circumference, radius, diameter, four quadrants (for co-ordinates)</p>

Statistics								
Themes within subject	Pre-School	Year R	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Present and Interpret		<p>count how many objects share a particular simple property</p> <p>present results using practical resources, pictures, drawings or numerals</p>	<p>interpret simple tables</p> <p>present results using lists and simple tables, with support</p>	<p>create and interpret tally charts, e.g. how many ___ are there?</p> <p>interpret simple pictograms with simple ratios 1, 2, e.g. how many of x are there?</p> <p>interpret simple pictograms with simple ratios 10, 5, e.g. how many of x are there?</p> <p>interpret block diagrams</p> <p>count objects in different categories showing the results in a simple table</p> <p>construct tally charts</p> <p>construct simple pictograms (ratio 2 or 10)</p> <p>construct block diagrams</p>	<p>interpret data in more complex tables</p> <p>interpret pictograms with ratio 3, 5, 20</p> <p>interpret bar charts with a scale of 2 units per cm</p> <p>interpret bar charts with scales of 5 or 10 units per cm</p> <p>present data using bar charts with a scale of 2 units per cm</p> <p>present data using bar charts with a scale of 5 or 10 units per cm</p> <p>present data using pictograms with a ratio of 2, 5 or 10</p> <p>present data using tables</p> <p>present data from pictograms or tally charts as a bar graph</p>	<p>understand that bar charts and pictograms show discrete data</p> <p>interpret bar charts with more complex scales e.g. scales of 20, 100</p> <p>present data using bar charts with a scale of 5 or 10 units per cm</p> <p>understand that time graphs show continuous data</p> <p>interpret simple time graphs</p> <p>present continuous data in time graphs</p>	<p>read and interpret information in complex tables, including timetables</p> <p>read and interpret information presented in a line graph e.g. conversion between known imperial and metric measures or temperature at different times of day</p>	<p>interpret pie charts</p> <p>construct pie charts</p> <p>construct line graphs with two variables</p> <p>interpret the mean as an average</p> <p>calculate the mean</p> <p>identify when it is appropriate to calculate the mean and when not</p>
Reasoning and Problem Solving (refer to skills at the end of the document)			<p>compare how many objects there are in simple categories shown in a table e.g. are there more apples or more oranges?</p>	<p>solve problems that need adding up of objects in different categories</p> <p>compare how many objects there are in different categories, e.g. which fruit is there most of?</p> <p>ask a friend a question that needs adding up or comparing</p> <p>sort objects in different categories by quantity</p> <p>use in other areas of the curriculum (e.g. science) as a way of presenting results</p>	<p>use information from tables to solve one-step and two-step questions, e.g. 'How many more?' and 'How many fewer?'</p> <p>use information from pictograms to solve one-step and two-step questions</p> <p>use information from scaled bar charts to solve one-step and two-step questions</p> <p>use in other areas of the curriculum (e.g. science) as a way of collating data</p>	<p>solve a mix of comparison, sum and difference problems using information from bar charts or pictograms</p> <p>solve simple comparison, sum and difference problems using information from time graphs</p> <p>make links between a time graph and a story e.g. tell a story to match a simple graph</p> <p>use in other areas of the curriculum (e.g. science) as a way of collating data</p>	<p>solve multi step problems using information presented in a line graph</p> <p>complete missing information in complex tables, including timetables</p> <p>use in other areas of the curriculum (e.g. science) as a way of collating data</p>	<p>use pie charts to solve problems</p> <p>use line graphs to solve problems</p> <p>identify simple relationships in line graphs e.g. the line shows that ___ is double ___</p> <p>use in other areas of the curriculum (e.g. science) as a way of collecting and presenting data</p>
Terminology	sort, group, same, different	set, list, information, order, count,	table, label, title, tally, match	vote, graph, block graph, pictogram, represent, most popular, most common, least popular, least common	chart, bar chart, frequency table, Carroll diagram, Venn diagram, axis, axe	discrete data, continuous data, time graph	line graph	mean, pie chart, construct

Reasoning and Problem Solving								
Themes within subject	Pre-School	Year R	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Reasoning	<p>recognise and extend ABAB patterns, e.g. stick, leaf, stick, leaf</p> <p>create new ABAB patterns</p> <p>notice and correct an error in a repeating ABAB pattern</p> <p>talk about and identify the patterns around them, for example: stripes on clothes, designs on rugs and wallpaper</p> <p>begin to compare objects according to properties, such as shape or size</p> <p>sort familiar objects into two groups, making choices, e.g. teddy bears and dolls, apples and bananas</p> <p>say why they chose to put an object in the group they did</p>	<p>recognise and describe simple repeating patterns involving numbers or shapes e.g. AABBAABB, ABCABC</p> <p>continue simple repeating patterns involving numbers or shapes</p> <p>create simple repeating patterns involving numbers or shapes</p> <p>say what they are trying to find out</p> <p>sort familiar objects into three or more obvious groups e.g. different colours</p> <p>sort familiar objects into two or more groups based on comparisons e.g. long/short/dark/light</p> <p>describe ways they have sorted objects using comparative language e.g. longer/shorter</p>	<p>recognise, describe and continue more complex patterns involving numbers or shapes</p> <p>create more complex patterns involving numbers or shapes</p> <p>give reasons to justify what might come next in a simple sequence of shapes or numbers</p> <p>make predictions and test these with examples, using mathematical language</p> <p>with support, answer a question by recording information in lists and simple tables</p> <p>say what they have found out</p> <p>explain why an answer is correct or incorrect</p> <p>use diagrams (e.g. three separate circles) to sort objects into three or more separate groups according to a given criterion</p> <p>suggest a different criterion for grouping the same objects</p>	<p>respond to 'What if...?' questions, making predictions based on mathematical knowledge</p> <p>justify their reasoning logically, using phrases, such as 'I know that... so...' or 'I am sure of that because...'</p> <p>describe and explain decisions and methods chosen</p> <p>explain what they have found out using mathematical language</p> <p>record work and results in lists and simple tables</p> <p>use a simple Venn diagram (two overlapping circles) to sort objects into three groups – x; y; and both x and y</p>	<p>suggest a line of enquiry (questions that could be asked)</p> <p>start to understand a general statement by finding particular examples that match that statement</p> <p>identify examples for which the statement is true or false</p> <p>test out a statement or prediction further, with examples that are checked systematically to make sure none are missed</p> <p>record work and results in tables, bar charts or diagrams</p> <p>check work and justify answers/conclusions logically</p>	<p>make a prediction or general statement involving numbers or shapes</p> <p>systematically collect and organise information to test out statements or questions</p> <p>find a counter example to disprove a statement</p> <p>provide a logical argument that has a complete chain of reasoning to it, using phrases and words, such as 'because...', 'therefore...', 'and so...', 'that leads to...', 'which means that...'</p> <p>explain reasoning using diagrams, graphs and text</p> <p>in making conclusions, spot patterns in results and suggest generalisations and rules</p> <p>use a Venn diagram of two overlapping circles inside a rectangle to show x; y; x and y; and neither x nor y</p>	<p>suggest, plan and develop lines of enquiry and hypotheses</p> <p>identify patterns within linear number sequences</p> <p>express generalisations and proofs using symbolic notation as well as words</p> <p>search for a solution by trying out own ideas and justifying solutions</p> <p>use both examples and counter-examples to justify conclusions, explaining use</p> <p>use simple known facts (e.g. properties of rectangles) to calculate answers, explaining the method clearly.</p> <p>use simple known facts (e.g. properties of rectangles) to generalise further, explaining the method clearly.</p>	<p>generate sequences and start to understand the idea of an expression, such as $2n$, $2n+1$ and n^2</p> <p>express generalisations algebraically</p> <p>develop and evaluate lines of enquiry</p> <p>decide how best to represent conclusions</p> <p>decide what further questions to ask</p> <p>explain reasoning using precise mathematical language</p> <p>give mathematical justifications and proof, using logical arguments</p> <p>make use of complex Venn diagrams to illustrate classifying, e.g. geometry</p> <p>apply known mathematical facts, e.g. properties of angles, lines and shapes to calculate answers</p>
	Problem Solving	While solving real-world mathematical problems...						
	<p>make links to real-life, through role play and through helping adults</p> <p>use a range of practical resources and equipment</p> <p>understand a question or instruction that has two parts, e.g. 'Get your coat and wait at the door.'</p> <p>talk about what they have done</p>	<p>think aloud how to work things out</p> <p>answer questions by choosing and using suitable equipment</p> <p>record simple numerical and pictorial representations</p> <p>use concrete objects to work out the answer</p> <p>explain to an adult how they worked out the answer</p>	<p>identify what the question means</p> <p>identify the key information given in a one-step puzzle or word problem</p> <p>identify the operation needed to solve a one-step puzzle or word problem</p> <p>use concrete objects or pictures to help work out the answer</p> <p>use arrays to help work out the answer with support of an adult</p> <p>check the answer in the context of the problem to be sure it makes sense</p> <p>show the working out and the answer clearly</p> <p>try a range of possible solutions to solve problems</p>	<p>identify the key information in a two-step puzzle or word problem, where the two steps are shown in the question</p> <p>identify the operations needed to solve a two-step word problem, where the two steps are shown in the question</p> <p>suggest a way to solve a problem</p> <p>apply their increasing knowledge of mental and written methods</p> <p>use multiplication and division methods as needed, e.g. arrays, repeated addition, mental methods and facts.</p> <p>adopt a suggestion by an adult or their peers</p> <p>use lists and tables to organise and interpret given information, with support</p> <p>use diagrams to find a solution, with support</p>	<p>identify the key information in a two-step puzzle or word problem</p> <p>identify and order the operations needed to solve a two-step word problem</p> <p>identify any resources needed</p> <p>re-phrase a problem in their own words</p> <p>represent a puzzle or problem using number sentences, statements and diagrams</p> <p>use lists and tables to organise and interpret information</p> <p>recognise and use connections between current and past problems</p> <p>use diagrams to find a solution</p> <p>record with a clear ordered structure</p> <p>search for a solution by trying out own ideas</p>	<p>break down a problem into steps</p> <p>explain why particular information is key, in two-step problems</p> <p>explain why particular operations are the right ones to use, in two-step problems</p> <p>identify the method to use and why, in two-step problems</p> <p>tabulate systematically the information in a puzzle or problem</p> <p>pose similar problems to a partner</p> <p>choose resources appropriate to the task</p> <p>find more than one solution, where appropriate, and check their work in the context of the problem</p> <p>check results independently, looking for errors and ways to improve</p> <p>develop their own methods of logically recording</p>	<p>choose the best way to represent the information in a problem, e.g. verbal description, tables, charts, pictures, database, diagrams etc.</p> <p>decide which operations to use and why, for multi-step problems</p> <p>decide which methods to use and why, for multi-step problems</p> <p>make connections to previous work to suggest ways to tackle complex problems</p> <p>record the steps or calculations needed to solve a problem, using symbols where appropriate</p> <p>present information/results in a clear and organised way, including using ICT if appropriate</p> <p>check methods and work independently, looking for errors and ways to improve</p> <p>use the meaning of the equals sign as equivalence in laying out a problem, e.g. $4 \times 35 = 2 \times 2 \times 35$</p>	<p>solve problems by breaking down complex problems into simpler steps or tasks</p> <p>try alternative approaches and resources to overcome difficulties, including ICT</p> <p>turn simple expressions and formulae from symbols to words and vice-versa</p> <p>round answers to specific degrees of accuracy using a wide range of units</p> <p>estimate and give solutions to an appropriate degree of accuracy</p> <p>use letters and symbols to represent unknown numbers and variables, e.g. in a table, formula or equation</p>

MATHS PROGRESSION MAP

				begin to work systematically check work for mistakes, including considering appropriate units	understand there can be different viable solutions to the same problem		reflect on others' explanations, methods and strategies, and use these to improve their own work	
Terminology	pattern, make, correct	create, continue, copy, repeat, repeating pattern, carry on, answer	justify, sequence, word problem, operation, working out	two-step, list, table, organise, reasoning, logical	general statement, systematic, diagram, number sentence	errors, test out, chain of reasoning, conclusion	symbol, generalisation, counter-example, proof	general term, algebraic
