

## Year 2- Plants

### Must have knowledge:

- Seeds and bulbs grow into mature plants
- Plants need water, light and a suitable temperature to grow and stay healthy.
- Changing the amount of water, light and temperature affects how a plant grows

<p><b>Some plants grow best in full sun.</b></p>	<p><b>Some plants grow best in the shade.</b></p>
<p><b>Some plants need lots of water.</b></p>	<p><b>Some plants don't need much water.</b></p>

Key vocabulary	
seed	the part of a plant which can grow into a new plant.
bulb	a rounded underground storage organ present in some plants
plant	a living thing that grows in the earth and has a stem, leaves, and roots
germinate	When a seed begins to grow its shoots. Seeds need warmth and water to germinate.
seedling	A young plant that has grown from a seed.
bud	Growth on a plant that develops into a stem, leaf or shoot.
temperature	a measure of how hot or cold it is.
